

Printing Pictures and Screenshots from iPads

1. Take a screenshot of student work on the iPad, or some apps let you save as a picture.
2. Open Dropbox on the iPad, click uploads at the bottom of the app. Then click the plus sign (+) in the upper right corner.
3. Find the picture or screenshot and click it (it will put a check mark on the picture) and then click “upload” in the upper right corner. You can select more than one picture to upload.
4. You will see a blue status bar as each uploads.
5. Go to your laptop, open your Dropbox folder, and you will see the pictures there.
6. Drag them out of the Dropbox folder to your desktop. You will need to rename right after dragging each one.
7. Print as you would any other picture! :)
